

Diya Ditto

Computer Science Engineer | Frontend Developer | React Enthusiast
+91 7306457535 | diyaditto@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science Engineering graduate focused on frontend development, responsive UI systems, and scalable web applications. Passionate about building modern digital experiences using React.js, Tailwind CSS, and AI-driven systems. Strong interest in modern frontend engineering, UI/UX, and continuous skill development through real-world projects and hackathons.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL
Frontend: HTML, CSS, React.js, Tailwind CSS
Backend Basics: Node.js, Express.js, MongoDB
Tools: Git, GitHub, VS Code
Concepts: REST APIs, Responsive Design, UI/UX Fundamentals

PROJECTS

- AI-Based Traffic Control and Emergency Vehicle Priority System**2025 – 2026
*Python, AI Concepts, SUMO Simulation Platform**Major Project*
 - Developed an AI-assisted traffic management system using the SUMO simulation platform to optimize traffic flow and reduce waiting delays.
 - Implemented emergency vehicle prioritization mechanisms to dynamically manage traffic signals for improved emergency response efficiency.
 - Simulated multiple traffic scenarios to analyze congestion patterns and improve traffic signal decision-making performance.
- Placement Resource and Academic Portal**2024 – 2025
*HTML, CSS, JavaScript**Mini Project*
 - Developed a centralized platform for placement preparation resources and academic materials under a single system.
 - Designed an organized interface to improve accessibility and streamline resource management for students.
 - Reduced the effort required to access placement and academic resources by integrating materials into one platform.
- Modern Developer Portfolio Website**2026
*React.js, Tailwind CSS, Framer Motion**Personal Project*
 - Designed and developed a responsive portfolio website using React.js and Tailwind CSS with modern UI/UX principles.
 - Implemented glassmorphism effects, smooth animations, and responsive layouts to create a premium frontend experience.
 - Improved personal branding and professional online presence through a modern industry-focused portfolio platform.

ACHIEVEMENTS

- Selected among 60 women participants for the Kerala Startup Mission cohort program.
- Secured 4th position in Buildathon Hackathon conducted by IEEE Kochi Hub during 2024–2025.
- Participated in a 24-hour AI-focused hackathon conducted in January 2026.
- Contributed to AI and healthcare-focused hackathon projects including pharmacy accessibility solutions for elderly users.

INTERNSHIP & CERTIFICATIONS

- IBM AI & Machine Learning Internship**2025
*6-Week Internship Program**Certificate Available*
 - Completed a 6-week AI and Machine Learning internship focused on foundational AI concepts, machine learning techniques, and practical applications.
 - Gained exposure to AI-driven problem solving, data handling, and modern technology workflows through guided learning and hands-on activities.
 - Developed understanding of machine learning fundamentals, intelligent systems, and real-world AI applications.

EDUCATION

College of Engineering ChengannurKerala, India
*B.Tech in Computer Science Engineering*2022 – 2026
